

How to change currency and number format?

While setting up the application you would need to change the currency and the number formats appropriately. Be it the INR, USD or any other currencies, the application supports the use of such currencies. Also, the number formats, such as the number of digits after the decimal point can be changed easily in HDPOS Smart.

The procedure to change the currency and the number format is as given below:

- 1. Run HDPOS smart.
- 2. Click on **Set-Up** button.

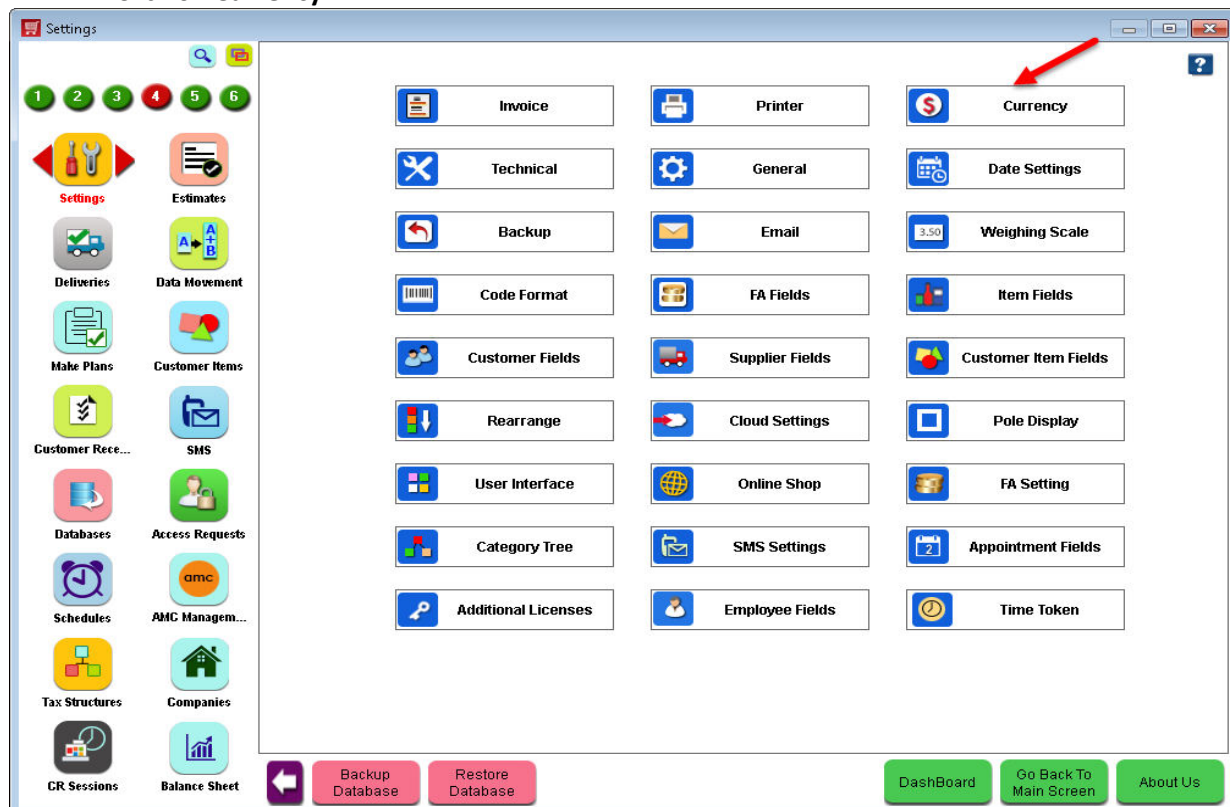

3. From the 4th page of setup, select **Settings**.

4. Click on **Currency**.

5. You will see the screen of **Currency Setting**.
